Humanscape

environments for people

What we do...

Humanscape's team of design and health consultants provide assistance with the development and implementation of therapeutic garden projects. We work with you from concept and design through to the development of programmes and related professional development.

With a strong history of delivering horticulture based therapy (HBT) outcomes, Humanscape is qualified to provide highest quality HBT consultation, design and advice to you, your clients and the greater community.

GET THE RIGHT ADVICE....

Humanscape will work with you and your team, to ensure

successful therapeutic outcomes on all projects.

Why engage Humanscape?

To ensure success of any project, the right professional advice should be sought... Engaging Humanscape will give you access to latest research and practices... and to Australia's leading authorities on the application of therapeutic principles in garden and intended spaces.

Engage Humanscape in planning...

When you engage the Humanscape team in the early phases of concept planning and development it may help avoid costly mistakes. We can ensure your projects are successful and provide optimal benefits and engagement for the intended population.

We have the diverse range of knowledge and life experience required to identify factors which contribute to successful therapeutic outcomes in garden design or landscape projects. We understand intention, motivation, design, accessibility, sustainability but most importantly we know and understand the user experience.

Reinvigorate your environment...

Any space or garden, can be transformed into a meaningful, sensory and therapeutic space by the Humanscape team of professionals. We will work closely with you (management, staff and residents) to identify issues and opportunities. We will then, provide appropriate recommendations to bring about positive change, engagement and results.

Provide meaningful activities & programs...

Gardens, plants and nature are extraordinary tools, and can provide opportunities for rehabilitation and healing in all aspects of human wellbeing. Humanscape meets the challenge by knowing how to utilise and optimise green spaces for maximum benefit. Humanscape can work with you to develop simple, effective and affordable solutions for any population.

H.B.T. Professional development & training...

Our research has shown there is indisputable evidence that proves access to nature enhances healing, rehabilitation, mental health and overall wellbeing across all ages and stages. To address the growing demand, Humanscape offers training and mentoring services to community, disability and care organisations.

Planning

- * Systematically gather input from all stakeholders
- * Evaluate existing gardens
- * Gather data relevant to the project such as orientation, services location, potential risks & opportunities
- * Translate therapy and wellbeing concepts into architectural and landscape plans
- * Evaluate landscape design feasibility. Will it work?

Design

- * Provide concept plans to turn existing gardens into active therapeutic spaces
- * Create new therapeutic gardens
- * Present ideas to enhance the function of a garden to maximise its use and accessibility
- * Provide concept drawings, plans and detail descriptions of the design
- * Provide landscape designs and plans ready for build

PD & Training

- * Evaluate existing practices and provide recommendation for enhanced engagements and therapeutic outcomes
- * Customise and facilitate professional learning
- * Develop individualised HBT programs for clients based on interest and available resources
- * Conduct training and provide experiential learning at KHG
- * Provide mentoring & coaching

Reports

- * Provide detailed reports on existing gardens and outdoor spaces
- * Critical assessment and recommendations of proposed projects
- * Review existing therapeutic practices and environments and provide recommendations based on goals and findings
- * Provide advice on the inclusion of horticultural based therapy in existing settings and environments
- * Ongoing therapeutic sustainability and integrity checks
- * Pre & post purchase reports on gardens. Suggestions for immediate, continuing and long-term requirements for optimum accessibility and therapeutic benefit

Consultation

- * Masterplanning - we will work with planners, developers, architects and landscapers to translate therapy and wellbeing concepts into plans
- * Workshop ideas to enable the integration of HBT concepts into existing organisational structure
- * Provide recommendations based on contemporary research evidence how to get the best out of your garden
- * Workshop relevant issues, for optimum benefits and results
- * Represent your interests the project construction process.
- * Provide creative input and solutions
